DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Lupien (5,857,153).

Regarding claims 1, 8, Lupien discloses a cellular communication network comprising the steps of transmitting from originating mobile switching center to a home location register a request for activation/deactivation of said additional service information (see fig.12A, elements 170, 171, 172 and its description); updating said

addition service by said HLR (see fig.12A, element 172, col.20, lines 55-56 and its description); and transmitting from HLR to a visitor location register of said originating MSC a response message responsive to said request message, said response message includes said updated information of said subscriber (see fig.12A, element 173, col.20, lines 56-57 and its description).

Regarding claims 2, 9 Lupien further discloses the step of verifying whether said subscriber is registered for said additional service information in response to said request message received by said HLR (see col.21, lines 20-30 and its description).

Regarding claims 3, 7, 10 and 13, Lupien further discloses the step of notifying said originating MSC if said subscriber is not registered for said additional service information via said response message (see fig. 11, col. 20, lines 9-45 and its description).

Regarding claims 4-6, 11-12, and 14, the Examiner takes Official notice that these features are well known and inherent in mobile telephone networks.
